

DeFelsko[®] DOLLY10

Single-use dollies for adhesion testing

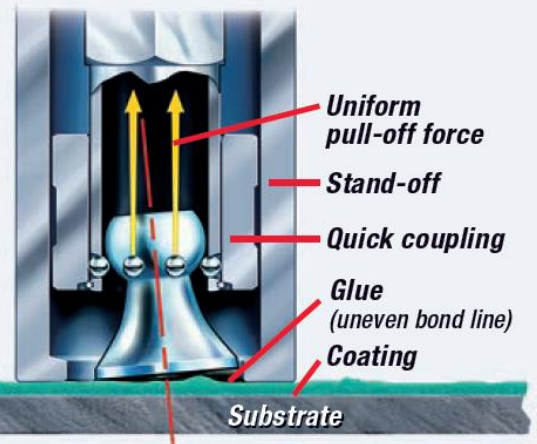

- The **DeFelsko[®] DOLLY10** is for use with the **PosiTest AT Series**.
 - Ideal for measuring higher bond strength finishes such as coatings on metal(s)
 - Maximize capability and measurement resolution across a wide range of bond strengths
 - Self-aligning dollies
-
- Size: 10mm Ø
 - Material: Aluminium
 - Maximum Pull-Off Pressure (AT-A): 14,000psi / 96MPa
-
- Quantity: One Pack with 10 pieces

Application example:

Self-Alignment Feature

The PosiTest Adhesion Tester compensates for misalignment. The self-aligning, quick-coupling actuator and spherical articulating dolly head enable uniform distribution of the pulling force over the surface being tested, preventing a one-sided pull-off.

Ordering information:

Typ: **DOLLY10**
Art.-no: **8330DFATDOLLY10**
